

MS400

Fish Processing Machine

Medium-size band saw for fresh frozen fish

Four pieces cutting of frozen

Chopping into block of frozen tuna

Tail cut sorting of frozen

High Speed Rotation

It achieves the increasing processing efficiency and the beautiful section by increasing the rate of

Power Up

It equip the motor which goes 2.2kw to 3.7kw. It is allround player starting bonito up to tuna. It reduces the task of

SUS304

We use a stainless steel frame of SUS304 which has excellent durability. With 10 years warranty.

Adhere. With Gutter

you can choose a style of table surface depends upon the stuff you cut.

The processing efficiency greatly increases by this one machine.

Fish Processing Machine

MS-400

Saw blade tension light

We can decide the position of saw blade tension by lighting. By making identical tension, we can reduce a bearing or task over the saw blade and we can make efficient work.

Stainless steel tire

We equip this stainless steel tire. It solve the problem of running off of saw blade by the rust corrosion. It is easy to wash by water.

Beautiful section

The high speed rotary achieves the section beautifully. It promises the high yield by special saw blade.

SUS304 frame

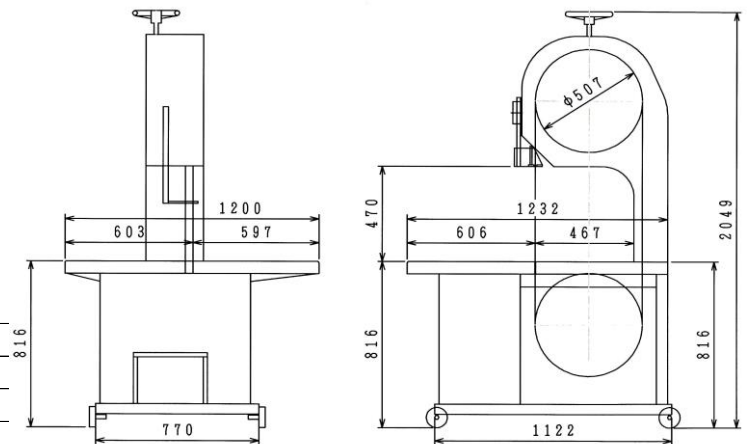

We use SUS304 for frame. It is strong in rust and corrosion, and has a high durability. We warranty for 10 years.

Easy to Clean

It is clean and decent '304' made all stainless steel body. It is rust-proof and easy to wash by water. Can be clean throughout

Machine specifications

| | |
|-----------------------------|--|
| Maximum pull cutting height | 470H |
| Table dimension | 1230 × 1200 |
| Machine dimension | 1230 × 1200 × 2048 |
| All over weight | 440kg |
| Motor | 2.2kw to 3.7kw |
| Power source | Three-phase circuit Hz50/60 AC 200v~440v |
