N
0
L

Anyone can operate in a minute.

You can use it on the day you purchase without subtle adjustment, just by slide into sending belt which with gearbox.

Excellent center deduction framework.

By using MKE original center deduction framework, it divides the fish into two even curved fish. It doesn't require round or dress.

It is hygienic and strong durability.

We use SUS304 for frame. It is rust-proof, non-corrosive and has high durability.

Beautiful section

The thin saw blade (0.6t) promises reducing of waste, beautiful section and high yielding.
